

C⁴ Columbus Area Career Connection

**1-Year Follow-Up
Study**

CLASS OF 2014

**Teresa L. Weichman
June, 2015**

C⁴ Columbus Area Career Connection 2013 - 2014 One-Year Follow-Up Study

The local One-Year Follow-Up Study of the class of 2013-2014 reports the status of 332 of the 345 exiting seniors who completed C⁴ programming their senior year of high school. This 96 percent return confirms that the findings in this study present a reliable and accurate status of each student. The findings, as detailed in this document, confirm the effectiveness of the education C⁴ provides each student in that they completed their C⁴ class, graduated from high school, continued their education and secured a higher wage from training-related employment.

C⁴ continues to meet the challenge of completing two follow-up studies involving two different sets of students. The local C⁴ study cohort includes a graduating class of students who were enrolled in a multiple-hour C⁴ Career & Technical Education (CTE) class during their senior year, thus showing the impact teachers, staff and programming have on C⁴ student success. By contrast, the State study includes the senior class of students who took at least six credits in CTE during the course of high school, not necessarily during their senior year, and not all CTE credits necessarily from C⁴ or the Area CTE District (District #41). This scattered group complicates the ability to make contact. To add to the challenge, C⁴ is unaware of the actual number of students included in the State study. C⁴ is only provided names of students the State has no means of tracing using social security numbers or students who are involved in activity outside the State of Indiana. C⁴ participates in the State study, which usually includes 400-450 students, solely to ensure that the required Placement Core Indicator is met.

It came as no surprise that contacting students was once again a challenge; however, having student mobile numbers made a positive difference. While accurate and reliable, some information came from teachers, family members or social media, leaving some information unavailable such as satisfaction with C⁴ and hourly wages earned. In comparing this information with previous years, the variance is insignificant to the results. There has always been reluctance in reporting wages, and that continues to hold true. One could deduce that satisfaction, while very abstract, could come from the connection between training related figures for employment and education. Overall, 65 percent of the C⁴ Class of 2012 was engaged in training related activities which could infer satisfaction, and certainly supports the effectiveness of C⁴ education.

Our vision states that “C⁴ will connect community resources to provide career education for all students while laying the foundation for life-long learning.” The results of this study are found to be highly reflective of the total class, due to the 96 percent return rate.

C⁴ has chosen to view follow-up statistics by Clusters. This view provides a more focused perspective and promotes program improvement through teams developed to deliver connected occupational training. Clusters will compile trend data to enable teams to set goals for improvement and monitor achievement.

As a result, the information gained from respondents of the Class of 2014 is shared in the statistical review of the findings and recommendations that follow:

In terms of Employment . . . (See Employment chart and graphs, pages 12, 13, 21, 22, 23 & 24)

- . . . **79% Employed**, of which
 - 60% Full-time**
 - 30% Part-time**
 - 7% Military**
 - 3% Stay-at home parent**
- . . . **45%** of the respondents are employed in **C⁴ Training Related** positions.

In terms of Education . . . (See Education chart & graphs, pages 14, 15, 16, 17, 18, 19, 20, 21, & 24)

- . . . **Overall, 100% Graduated or completed requirements for high school completion**
- . . . **99.7% Graduated according to NCLB laws**
 - 14% General Diploma**
 - 57% Advanced Core 40/Core 40 Diploma**
 - 8% Academic Honors Diploma**
 - 8% Technical Honors Diploma**
 - 12% Both Technical & Academic Honors Diplomas**
 - 1% Certificate of Completion**

- . . . **59% Continuing Education**, of which
 - 58% Four-Year Colleges/Universities.**
 - 34% Two-year Associate Degree.**
 - 8% Trade/Technical or Business Schools.**
- . . . **79%** are continuing their education in **C⁴ Related** areas of study.

Wage Statistics (See Wage chart & graphs, pages 12 & 13)

At the time of this study, the minimum wage was \$7.25 per hour. Of those who reported wages on this study, C⁴ learned that:

The Training Related Wage averaged \$12.78 per hour
The Non-Training Related Wage averaged \$9.39 per hour.

The Training Related wage is \$5.53 above minimum wage, and
\$3.39 more than those who earned wages
from non-training-related employment.

NOTE:

A breakdown of Follow-Up information from Area 41 Schools can be found on **Pages 25 – 28.**

Review of Findings

1. The 96 percent **return** rate confirms that the findings in this study present a reliable and accurate status of each student. Additionally, this return rate confirms the effectiveness of the education C⁴ provides each student in that they completed their C⁴ class, graduated from high school, continued their education and secured a higher wage from training-related employment.

2. The **graduation** rate for the class of 2014 is remarkable at 100 percent, a rate never before achieved. While Indiana is a waived State for No Child Left Behind (NCLB), the changes associated with the waiver are still unclear. This study documents the graduation rate to include all students who earned a work-based readiness waiver, certificate of completion, GED or any State-recognized diploma. The NCLB graduation rate stands at 99.7 percent!
3. The total of respondents **employed** increased from 65 percent to 79%, a 14% jump, indicating an upturn in the economy.
4. **Continuing education** remained steady at 59 percent, likely due to an improved economy. It is impressive to note that 79 percent of those continuing their education are enrolled in higher education programs related to the C⁴ CTE area of study. The highest training related statistic of 80 percent was recorded in 2008. C⁴ graduates are receiving valuable training in high school through Seamless Pathway efforts to carry on their education by connecting them to post-secondary schools.
5. **Military** enlistment remains steady at 7 percent, with 34 percent of that number from law enforcement students choosing that career path. It should be noted that the 90 percent of all students enlisted in Military service are utilizing their training earned from C⁴.
6. The **training related wage** averaged at \$12.78 per hour, increasing \$1.97 from the previous year's results. This is by far the highest Training Related Wage ever earned by C⁴ graduates! The minimum wage at the time of this study was \$7.25, making the average training related wage \$5.53 above the minimum. Overall, the training related wage is \$3.39 higher than the average non-training related wage of \$9.39. Overall, the wage data confirms that C⁴ education develops graduates who are worthy of earning competitive wages. While the gap between the Training-Related wage and the Non-Training-Related wage has taken a huge jump from \$0.80 difference last year to \$3.39 difference this year. This is yet another indication that the state of our economy is improving and C⁴ students are graduating with a quality skill set.
7. This is the twelfth year for this study to assess overall **satisfaction** and benefit of taking a C⁴ program. On a scale of one to five, with five being the highest, respondents ranked their satisfaction with C⁴ education at 4.549. While accurate and reliable, some information obtained for this study came from teachers, family members or social media, leaving some data unavailable such as satisfaction with C⁴ and hourly wages earned. In comparing this information with previous years, the variance is insignificant to the results. This satisfaction rate is the highest ever recorded with this study, up from 4.4265 last year.

8. With reluctance in reporting wages and satisfaction being an abstract opinion, C⁴ looks at the connection between training related figures for employment and education. Overall, 82 percent of the C⁴ Class of 2014 was engaged in training related activities which could infer satisfaction, and certainly supports the effectiveness of C⁴ education.
9. Additionally, 99% of all students surveyed are engaged in employment, continued education or both, with only four (4) students reporting not being actively employed or attending school.

Closing Comments:

Each year that a C⁴ Follow-Up Study is completed, it is interesting to watch the statistics unfold to tell the C⁴ story for that class of students who are continuing their journey after high school. This is the eighth year for the C⁴ Follow-Up study to look at those students who were not engaged in employment, continued education, military service or stay-at-home parents.

This study found that four (4) of the 332 (one percent) students contacted were not engaged. This means that **99 percent (328)** of the students who completed C⁴ programs during the 2013-14 school year **were either competitively employed, pursuing higher education, raising their children as stay-at-home parents or enlisted in military service after high school.**

It is also important to point out that both **employment (79 percent)** and **continuing education (59 percent)** results show that C⁴ students are choosing appropriate placements after high school. It is always refreshing to see how many students involved in competitive employment, continued education or military service are using the training they received from C⁴ in their current endeavors. **C⁴ learned that 82% of the graduates from the class of 2014 are using their C⁴ education in their current placements.**

This data coupled with a **100 percent graduation rate** certainly proves that C⁴ provides students with valuable career and technical education training while still in high school, paving the road to a bright, competitive future.

Area 41: Participating School Information

A breakdown of Follow-Up information from Area District # 41 Schools can be found on **Pages 25 to 28**. It is remarkable that among Area District #41 CTE students **99%** were either **competitively employed, pursuing higher education or enlisted in military service after high school** and **73 percent** of those students are using C⁴ education in their current placements.

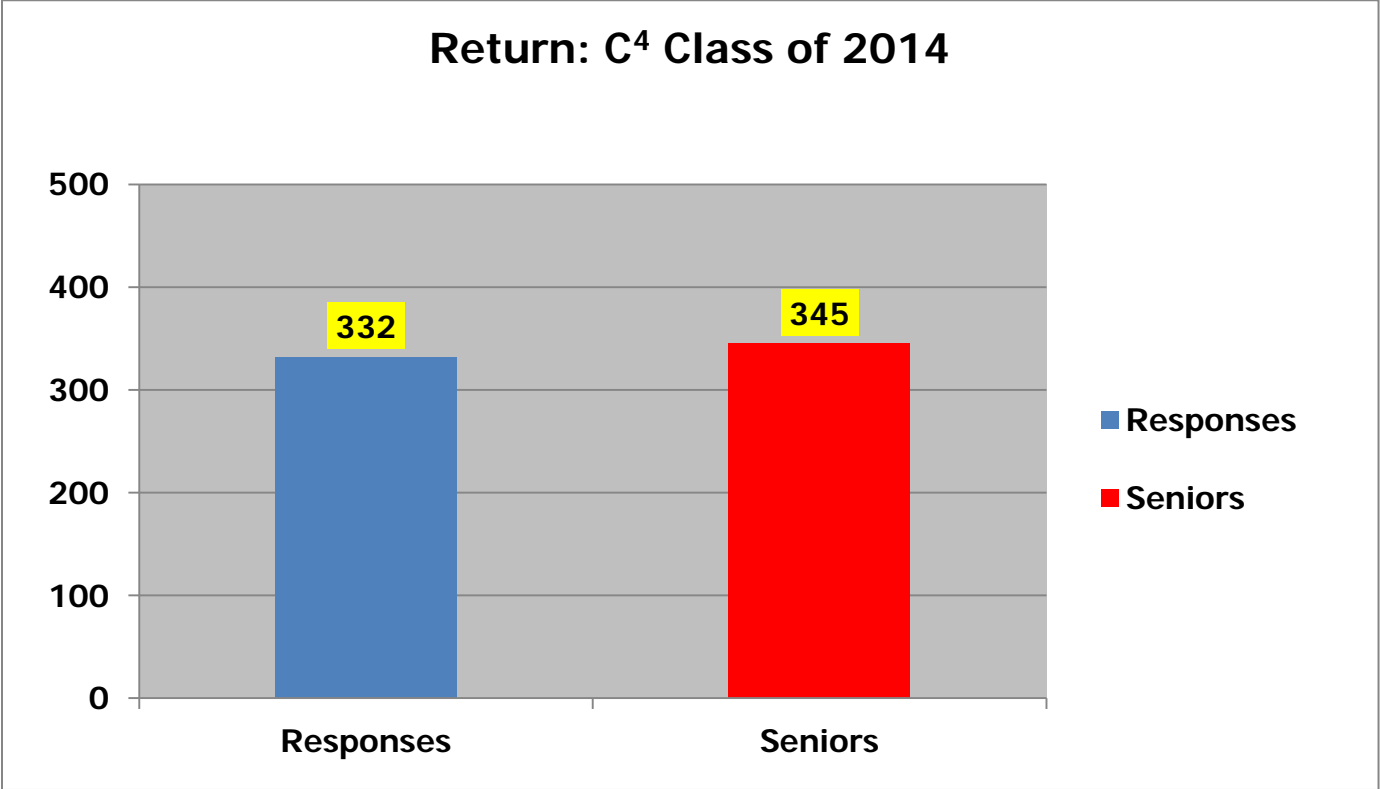

Recommendations

Viewing these statistics by Cluster will benefit C⁴ in its review of the results.

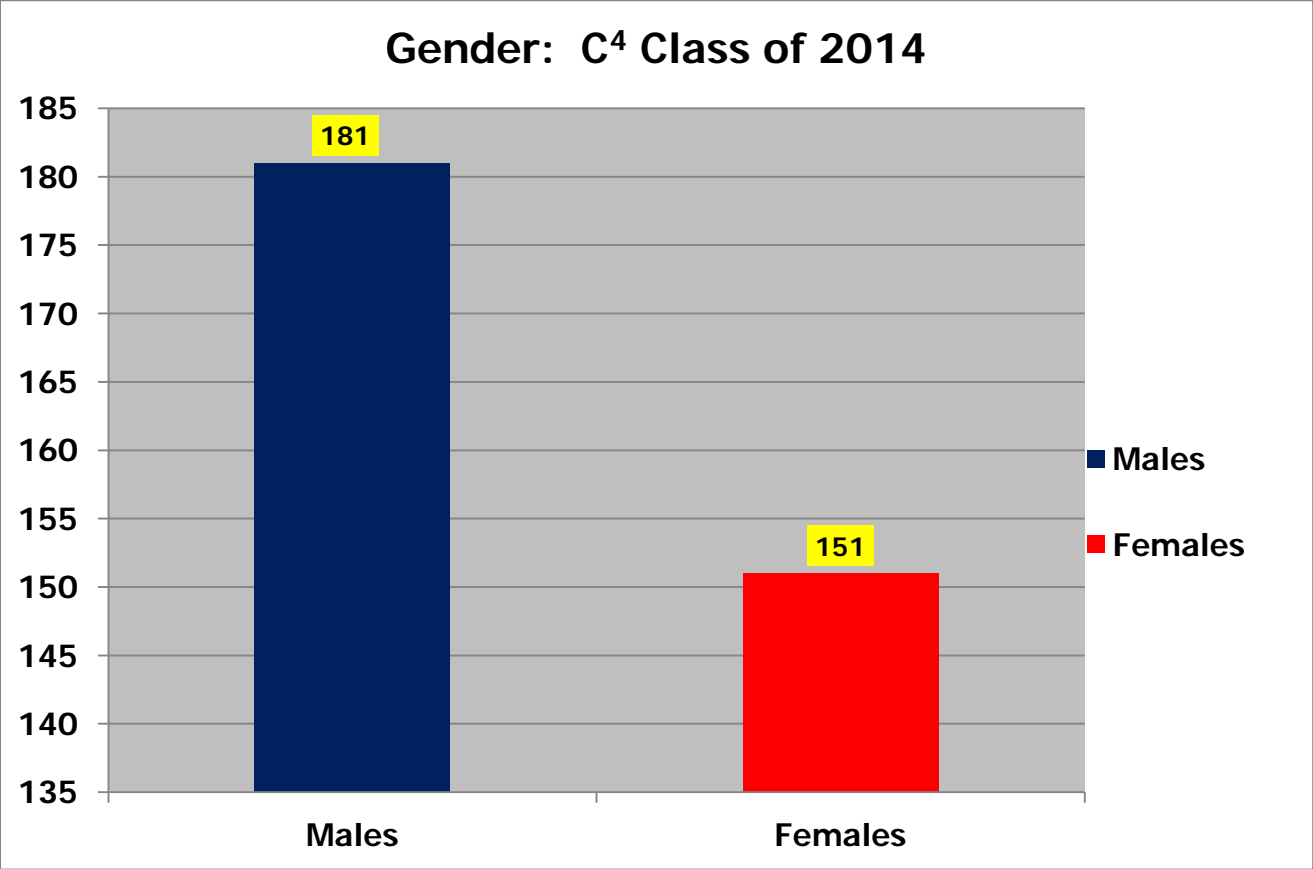

1. Career Majors meetings will analyze the information appropriate to each program area of study.
2. Staff will identify positive results and share best practices contributing to those results.
3. Best practices will then be shared with all staff for program improvement.
4. Staff will identify areas of concern and brainstorm strategies for improvement.
5. Strategies will be shared with all staff.
