# $C^{4}$ Columbus Area Career Connection 

1-Year Follow-Up<br>Study

Class of 2010

While the flood of 2008 seems to be in the distant past, $\mathbf{C l}^{\mathbf{4}}$ is still seeing some affects from its devastation to family lives. We have rebounded from the flood In terms of contacting students, and for the second year we were challenged with not only

## $\mathrm{C}^{4}$ Columbus Area Career Connection 2009-2010 One-Year Follow-Up Study

The One-Year Follow-Up Study of the class of 2009-2010 reports the status of 480 of the 494 exiting seniors who completed $C^{4}$ programming. From this $97 \%$ return, $C^{4}$ learned that its program completers are graduating from high school, continuing their education and training, and securing a higher wage from training-related employment.

For the second year we were challenged with completing two follow-up studies involving two different sets of students. The $C^{4}$ local study included 494 students who, from the official enrollment (ADM) for the 2009-10 school year, were enrolled as seniors taking a $C^{4}$ class. The State study required us to contact 462 students, many of which were different from those included in the local study. The State study randomly selected student Concentrators, meaning a student who at anytime during his/her high school career earned a minimum of six (6) CTE credits in an approved sequence, for their required study. Many of these students were not connected with $\mathrm{C}^{4}$ their senior year which removed the influence of $\mathrm{C}^{4}$ on the transition from school to the next level. Locally, we believe our study truly reflects the influence of $C^{4}$ on our students as they excited high school, making choices about the next phase of their lives.

The task of contacting 956 former students drained manpower resources as well as taxed our avenues for investigation. Thanks to the efforts of the $C^{4}$ Support staff and many countless hours tracking students, we were successful with both of the studies. Lack of land lines continues to plague our ability to contact students, while cell phones provide the best avenue for connecting with students and families. Facebook is a valuable resource for locating students' follow-up information.

Our vision states that " $C^{4}$ will connect community resources to provide career education for all students while laying the foundation for life-long learning." The results of this study are found to be highly reflective of the total class, due to the $97 \%$ return rate.
$C^{4}$ has chosen to view follow-up statistics by Clusters. This view provides a more focused perspective and promotes program improvement through teams developed to deliver connected occupational training. Clusters will compile trend data to enable teams to set goals for improvement and monitor achievement.

With that being said, the results from the respondents for the Class of 2010 were surprising and are shared in the statistical review of the findings and recommendations that follow:

In terms of Employment . . . (See Employment chart and graphs, pages 10, 14, 18, 19, 20, 25 \& 27)
. . . 74\% of the respondents are Employed, of which

> 46\% are employed Full-time
> 47\% are employed Part-time
> 5\% are in the Military
> 2\% Stay-at Home Parent
$\ldots \mathbf{5 0 \%}$ of the respondents are employed in positions that are related to their $\mathbf{C}^{\mathbf{4}}$ training.
In terms of Education . . . (See Education chart \& graphs, pages 11, 12, 13, 15, 19, 21, 22, 23, 24 \& 25)
.. . 98\% of the respondents GRADUATED from high school or received a GED, with a specific breakdown as follows:
19\% earned an Academic Honors Diploma
6\% earned a Technical Honors Diploma
5\% Earned both Technical Honors \& Academic Honors Diplomas
45\% earned an Advanced Core 40/Core 40 Diploma
23\% earned a General Diploma
2\% earned a Certificate of Completion
.. . 62\% of the respondents are CONTINUING their EDUCATION, of which
62\% are attending four-year colleges/universities.
35\% are attending two-year associate schools.
3\% are attending trade or business schools.
.. . 68\% of those continuing their education are enrolled in higher education
RELATED to the TRAINING they received from $\mathbf{C}^{4}$

## Wage Statistics (See Wage chart \& graphs, pages 10\& 20)

# At the time of this study, the minimum wage remained at $\$ 7.25$ per hour. Of those who reported wages on this study, $60 \%, C^{4}$ learned that: <br> The Training Related Wage averaged $\mathbf{\$ 1 0 . 2 3}$ per hour The Non-Training Related Wage averaged $\mathbf{\$ 8 . 1 5}$ per hour. <br> The Training Related wage is $\$ 2.98$ above minimum wage, and $\$ 2.08$ more than those who earned wages from non-training-related employment! 

## NOTE:

A breakdown of Follow-Up information from Area 41 School statistics for this study can be found on Pages 26-30.

## Review of Findings

1. The percent of return (97\%), has set a new record for $C^{4}$. The previous record of $96 \%$ was set in 2004. After a rebound of $95 \%$ last year, from an all-time low (89\%) two years before due to the flood, setting a new record is phenomenal. This record is due to the $\mathrm{C}^{4}$ Team working diligently to contact as many previous students as possible.
2. A total of 1653 telephone calls were made to reach the 480 exiting seniors, which averages 3.444 calls per respondent contacted. The number of calls does not reflect the calls made to students who were not contacted and this figure does not reflect Facebook and e-mail contacts. It is important to note that the number of calls was reduced by 332 calls due to the contacts made through social media. All in all, countless manpower hours went into the success of this study.
3. The graduation rate for the class of 2010 increase slightly to $98 \%$, up from $96 \%$ in 2009 , with the following diploma statistics:

Of the 480 students contacted . . . . 469 or $\mathbf{9 8 \%}$ of the respondents graduated from high school or received a GED.

## 88 or 19\% earned an Academic Honors Diploma

26 or 6\% earned Technical Honors Diploma

## 25 or 5\% earned Both Technical and Academic Honors Diplomas

212 or 45\% earned an Advanced Core 40/Core 40 Diploma
110 or 23\% earned a General Diploma
8 or $\mathbf{2 \%}$ earned a Certificate of Completion
4. The Class of 2010 was the first graduating class eligible to receive the Technical Honors Diploma. For the first year, $11 \%$ of $\mathrm{C}^{4}$ students earned this new honors diploma. A total of 139 students or $30 \%$ earned some kind of Honors Diploma: Technical, Academic or both. Kudos to the class of 2010!
5. The total of respondents employed jumped significantly from $54 \%$ last year to $74 \%$ this year, with the number of respondents employed in a training related position up from $41 \%$ to $50 \%$. The breakdown of full time, part time, military and stay at home parent remained steady. It appears that the economy is coming back slowly, seeing an increase of almost $10 \%$ of students choosing to enter the workforce straight out of high school in training related employment.
6. The total of respondents continuing their education dropped slightly from $71 \%$ to $62 \%$, with $68 \%$ training related. This drop can be attributed to the increase in employment, specifically training related employment.
Looking at whether post-secondary education relates to the $\mathrm{C}^{4}$ training received by the respondent is an important statistic reviewed by this study. Impressive is the fact that $68 \%$ of those continuing their education are enrolled in post-secondary programs related to the CTE area studied within $C^{4}$. This is down about $3 \%$ from last year, remaining steady year after year. We have learned over time that when the economy is down, faith in the manufacturing industry is questioned. The increase in employment gives merit to the idea that the economy is recovering.
Manufacturing is an economic driver indicator for $\mathrm{C}^{4} \mathrm{~s}$ CTE state district area. The Manufacturing Cluster is the largest $\mathrm{C}^{4}$ cluster with 112 students. From this study, $66 \%(74)$ of those students are continuing their education, with $81 \%$ related to their C4 area. As a comparison, the next largest clusters are Health Careers and Human Services with 83 students each. A total of $69 \%$ (114) those students are continuing their education, with $64 \%$ training related. This confirms that the manufacturing industry is rebounding, with several $\mathrm{C}^{4}$ graduates employed by local industry, including Cummins, PECO and other manufacturing industries in the area.
7. The total number of respondents who are involved in training related employment increased by $9 \%$ to $50 \%$ overall. This increase is likely due to rebound of the manufacturing economy.
8. Military recruitment remained steady at $5 \%$ after seeing a sharp dip from $9 \%$ of the $C^{4}$ class of 2008 enlisting to $5 \%$ from the class of 2009 and 2010. It should be noted, however, that the majority of students engaged in Military service were utilizing their training earned from $\mathrm{C}^{4}$ !
9. The training related wage increased by $\$ 0.55$ on the hour to $\$ 10.23$. The minimum wage at the time of this study was $\$ 7.25$, making the average wage $\$ 2.98$ above the minimum. Overall, the training related wage is $\$ 2.08$ higher than the average non-training related wage. This confirms that $\mathrm{C}^{4}$ education provides graduates worthy of competitive wages. It is important to note that 213 respondents, or $60 \%$, reported wages. Of the 213 who reported wages earned, 99, or $46 \%$, were training related.
10. This is the ninth year for this study to look at overall satisfaction and benefit of taking a $C^{4}$ program. On a scale of one to five, with five being the highest, respondents ranked their satisfaction with $C^{4}$ education at 4.411. While this satisfaction rate has remained steady throughout the nine years this data has been collected, it did increase by 0.119 .
11. The number of Stay-at-Home Parents remained at $2 \%$.
12. From our $97 \%$ Return, $61 \%$ of the $C^{4}$ exiting seniors earned Dual College Credit from their CTE class. That figure compared with the percent of $C^{4}$ students continuing their education (62\%) gives credibility to $C^{4}$ programming.

## Closing Comments:

Each year that a $\mathrm{C}^{4}$ Follow-Up Study is completed, it is interesting to watch the statistics unfold to tell the $\mathrm{C}^{4}$ story for that class of students who have taken the next step after high school. This is the fifth year for the $C^{4}$ Follow-Up study to look at those students who were not connected to a next step, a definable life activity including employment, continued education, military or stay-at-home parent.

This study found that 37 of the 480 ( $8 \%$ ) students contacted were not engaged in working, in the military, continuing education or a stay-at-home parent. This means that $\mathbf{9 2 \%}$ of the students who completed $C^{4}$ programs during the 2009-10 school year were positively placed in a next step after high school.

It is also important to point out that both employment (74\%) and continuing education (62\%) results show $\mathrm{C}^{4}$ students choosing appropriate next steps. And, it is always refreshing to see how many students involved in employment or continuing education are using the training they received from $C^{4}$ in their current endeavors. $\mathbf{C}^{4}$ learned that $\mathbf{5 0 \%}$ are using their $\mathbf{C}^{4}$ education in their current employment and $\mathbf{6 8 \%}$ are using their $\mathrm{C}^{4}$ training in their current post-secondary education.

This coupled with a $\mathbf{9 8 \%}$ graduation rate certainly proves that $C^{4}$ provides students with valuable career and technical education training while still in high school, paving the road to a bright, competitive future.

## Area 41: Participating School Information

A breakdown of Follow-Up information from Area 41 Schools can be found on Pages $\mathbf{2 5}$ to 30. Please note Page 26 \& 27 which show the number of students whose next step involved something that is directly related to their $\mathrm{C}^{4}$ education. It is remarkable that among Area \#41 CTE students $\mathbf{7 5 \%}$ of the students are involved in employment and 55\% of the students involved in post-secondary education. This is exactly opposite the results for the Class of 2009, with $71 \%$ in post-secondary education and $48 \%$ employed. It is good to note that $58 \%$ of those employed and $63 \%$ of those in post-secondary education have taken next steps that are related to their $\mathbf{C}^{\mathbf{4}}$ training.

While that is great information, it must be noted that 12 of these 110 students, or $11 \%$, who responded to this study are neither employed nor continuing their education.

## Recommendations

Viewing these statistics by Cluster will benefit $\mathrm{C}^{4}$ in its review of the results.
Recommendations:
a. Hold Cluster meetings to analyze the information.
b. Identify programs that have not witnessed growth from their graduates' next steps. Past studies are available for cluster members to review trend data.
c. Prepare a written plan of action is developed by each cluster to address areas of concern.
d. Devise a means for sharing information with stakeholders, particularly with counselors and post-secondary institutions to promote continued education and life-long learning.
